How TwinkleToes Will Stop The Spread

masks aren't just for superheroes

All TwinkleToes dance instructors will wear a mask for our lessons. We will have them on from the moment we walk into a school and/or TwinkleToes location and they will remain on until we leave that location.

We also ask that anyone over the age of 12 attending our community classes wears a face covering if you will be sitting in on the lesson.

hand washing with music

We will ask that all students wash their hands before and after each TwinkleToes dance class. We will make sure that we have plenty of time to wash hands outside of our 30 minute dance classes. We will also have hand sanitizer available for students during class.

props like bubble baths too!

All TwinkleToes props will be cleaned and sanitized before and after each dance class. We will also utilize one time use items such as printable coloring pages and stickers to send home with our students.

How TwinkleToes Will Stop The Spread

creating our own bubble space

Part of our TwinkleToes stretch routine is to create our own dance space by blowing our bubbles around our bodies before we begin dancing. Not only are we limiting our class sizes based on each location's space but all TwinkleToes students will be spaced at least 6 feet apart at all times.

private dance lessons

We understand that some families will still want their little ones to enjoy TwinkleToes dance lessons but may have reservations about dancing in public spaces. We feel confident that our public lessons will be safe and fun, but we also offer private lessons and Virtual Lessons via Zoom to accommodate every family's needs and level of comfort.

helping others stay healthy

If your child is experiencing symptoms such as fever or cough, we ask that they do not attend their TwinkleToes dance lessons until they are feeling better. This is to protect both them and others from spreading illnesses.
